SUMMARY

Recent Informatics graduate from Universitas Sebelas Maret (GPA 3.64/4.00) with internship experience in e-Learning implementation at Balai Pusdiklat PT KAI and web development at PT. Winnicode Garuda Teknologi Indonesia. Skilled in machine learning, web development, database management, and mobile development, with a Machine Learning Cohort certification from Bangkit Academy. Demonstrates strong project planning, analytical thinking, and teamwork abilities, with hands-on experience in building learning management systems, content platforms, and ML-powered applications. Passionate about continuous learning, eager to contribute technical and analytical skills to a dynamic professional environment.

WORK EXPERIENCE

e-Learning Implementer - Internship **Jan 2025 - Feb 2025**
Balai Pusdiklat PT KAI

- Designed business processes and flowcharts for a Learning Management System (LMS), cutting course-setup time.
- Built a Knowledge Management System (KMS) website using PHP and MySQL.
- Developed a Mixed Reality training prototype in Unity.
- Collaborated with internal teams to align LMS content with organizational learning objectives.

Web Developer - Internship **Mar 2023 - Jul 2024**
PT. Winnicode Garuda Teknologi Indonesia

- Developed a News Portal website using Laravel.
- Built a CMS for article and media management, cutting average content-publishing time.
- Implemented backend systems and responsive user interfaces, reducing page load time.
- Coordinated with editorial and design teams to ensure consistent branding across the platform.

EDUCATION

Bachelor of Informatics **2022 - 2026**
Universitas Sebelas Maret — GPA: 3.64 / 4.00

- Relevant coursework: Data Structures & Algorithms, Database Systems, Machine Learning, Software Engineering, Computer Networks, Website Develepment, Mobile Development.

Machine Learning Cohort **2024**
Bangkit Academy (Coursera & Dicoding, in partnership with Google, GoTo, and Traveloka)

- Completed intensive Machine Learning, Deep Learning, and Data Analysis training in Python, earning 20 university credit conversions.
- Built a capstone mobile app that detects drowsiness and logs self-reported sleep quality (1-10 scale), achieving 98% model accuracy.
- Collaborated in a cross-disciplinary team of 4 (ML, Mobile Dev, Cloud) to design and deploy the capstone project end-to-end.
- Completed 200+ hours of structured learning covering supervised/unsupervised learning, TensorFlow, and model deployment.

ORGANIZATIONAL EXPERIENCE

Event Staff
Fakultas Teknologi Informasi dan Sains Data **2023**

- Coordinated entry/exit flow for an event of 200+ new student, maintaining a zero-incident record.
- Curated and screened questions for guest speakers, improving session engagement.

Team Leader — KKN Tematik Literasi Kelompok 321
Universitas Sebelas Maret | Desa Bentakan, Kecamatan Baki, Kabupaten Sukoharjo **2025**

- Led a team of 8 members to design and execute a village literacy program, focusing on strengthening village library management and public reading culture.
- Coordinated with village officials (perangkat desa) and Dosen Pembimbing Lapangan to align program objectives with community needs.
- Oversaw execution of multiple literacy initiatives, including library data collection, reading services improvement, children's reading programs ("Bacakan Saya Buku," "Membaca Nyaring"), and a village-level literacy appreciation event.
- Presented final program results and recommendations at the closing session to village stakeholders.

RESEARCH & PUBLICATION

Final Thesis:
"Peningkatan Robustness Model End-to-End Steganografi Menggunakan AttenHideNet terhadap Beragam Distorsi Melalui Distortion-Aware Training"

- Manuscript under revision (revise & resubmit stage) at the IAES International Journal of Artificial Intelligence (IJ-AI), a Scopus Q3-indexed journal, under the title "Distortion-Resilient Deep Steganography via Distortion-Aware AttenHideNet Training".
- Developed a distortion-aware fine-tuning method for AttenHideNet, a deep-learning image steganography model, improving robustness against distortions such as JPEG compression, Gaussian noise, blur, and resizing.

CERTIFICATIONS

- Machine Learning — DeepLearning.AI & Stanford University (2024), No. YCHS3NCZU8VI
- DeepLearning.AI TensorFlow Developer — DeepLearning.AI (2024), No. 45KC021734O9
- Crash Course on Python — Google (2024), No. Z38OHR5I4Y73
- Blockchain Basics (2025), No. YQQRG0ZMYDHO
- Browser-based Models with TensorFlow.js — DeepLearning.AI (2024), No. J3LX6146BBJX
- Device-based Models with TensorFlow Lite — DeepLearning.AI (2024), No. XJ8TNQF1XP9E

ADDITIONAL INFORMATION

Hard Skills: Machine Learning, Deep Learning, Web Development, Database Management System (DBMS), Mobile Development, Data Analyst, Python, Laravel, TensorFlow, MongoDB, SQL, Java, Kotlin
Software Skills: Visual Studio Code, Android Studio, GitHub, Figma
Soft Skills: Project Planning, Project Management, Analytical Thinking, Problem Solving, Team Communication
